PROFILE

Full-stack developer and AI/automation engineer with production deployments across AWS, GCP, Render, and Vercel. Builds SaaS platforms with Stripe, Supabase, and JWT; LLM agent systems using LangChain, LangGraph, Google ADK, A2A, and MCP protocols; and automated pipelines with n8n and Playwright. Strong algorithmic foundation, 1100+ Codeforces problems solved (max rating 1361).

SKILLS

Languages

Python, TypeScript, JavaScript, C++, Java, PHP, SQL

Frameworks

React, Next.js, Node.js, Express, FastAPI, Flask, Tailwind CSS

Databases

PostgreSQL, MySQL, Supabase, Prisma

Cloud & DevOps

AWS EC2, GCP, Docker, GitHub Actions, Nginx, PM2, Render, Vercel, Firebase

AI/ML

LangChain, LangGraph, Groq, Gemini API, HuggingFace Transformers, PyTorch, Scikit-learn, FAISS, RAG, QLoRA, NLP

Automation & Protocols

n8n, Playwright, Make, Zapier · ADK, A2A, MCP, Ollama

EXPERIENCE

Industrial Attachment (Internship)

Monstarlab Bangladesh

03/2024 – 04/2024 | Dhaka, Bangladesh

- Built Ed-Tech frontend with React + Tailwind CSS; CI/CD on Firebase; agile with JIRA

Full-Stack & AI/Automation Developer

01/2026 | Remote

- Built and deployed production SaaS and AI agent systems (AA Trading, KasbyIQ, AI Currency Agent) across AWS EC2, GCP, and Vercel, LLM integration, multi-agent protocols (ADK, A2A, MCP), and automated pipelines.

EDUCATION

B.Sc. Engg. in Electrical & Computer Engineering

Rajshahi University of Engineering & Technology

01/2020 – 10/2025 | Rajshahi, Bangladesh

PROJECTS

AA Trading: Software License SaaS

React, Node.js, Express, Stripe, Supabase, JWT, GitHub Actions, AWS EC2, Nginx

- Production SaaS platform for software license sales; Stripe payments, Supabase PostgreSQL, role-based JWT auth, automated CI/CD to AWS EC2 via GitHub Actions, served via Nginx and PM2

KasbyIQ: Real Estate Fit Platform

TypeScript, Node.js, Prisma, PostgreSQL, JWT

- Psychographic fit scoring platform matching real estate agents to brokerages across 6 behavioral dimensions; dual broker/agent dashboards, longitudinal surveys, automated coaching interventions

AI Currency Agent: ADK + A2A + MCP

Python, FastAPI, Docker, Groq, AWS EC2

- Multi-agent Agentic AI system with Google ADK orchestration, A2A protocol, and MCP tool calling; Dockerized and deployed on AWS EC2 via FastAPI

Facebook Business AI Automation

Python, Flask, Groq AI, LLaMA 3.3, Facebook Graph API, Google Apps Script

- Automated 7 Facebook posts/day via Google Sheets pipeline; Groq LLaMA 3.3 70B handles Bangla NLP comment replies; Messenger webhook resolves customer queries zero infrastructure cost

LLaMA-2 QLoRA Fine-Tuning

PyTorch, HuggingFace Transformers, QLoRA GitHub

- Fine-tuned LLaMA-2 7B using 4-bit quantization and LoRA adapters on Guanaco 1K dataset (~16M trainable parameters); built companion RAG pipeline with FAISS vector search for PDF question answering

ACHIEVEMENTS

- 1,100+ problems on Codeforces · max rating **1361** · Div. 2 & 3 competitor
- 2nd place**, ECE Youth Programming Contest, RUET (2022)
- ICPC preliminary rounds; represented RUET at MBSTU Inter-University Contest

CERTIFICATIONS

Gen AI for Software Developers Specialization

IBM (via Coursera)

Machine Learning with Python

IBM (via Coursera)

Deep Learning and Reinforcement Learning
